

## APPLICATIONS

Pumping of liquids in landfill, drainage of liquids from piezometric wells, sampling of fluids in **sites contaminated by hydrocarbons** and groundwater. The ATEX pumps in conformity with 2014/34/EU Directive can be installed in potentially explosive atmospheres according to the marking explained hereafter.

## FEATURES

- Multistage centrifugal electric submersible pumps **for 3" wells**.
- External pump case, delivery port, suction port, shaft and other components in AISI 316 stainless steel.
- Impellers and diffusers in special technopolymer.
- Temperature of pumped liquid: max +40 °C.
- Special mechanical seal, particularly robust and reliable, with high resistance to wear and chemical abrasion.
- **Available the version with Maxi-filter 90 or with Slope Riser.**

## MOTOR

- 2 poles asynchronous motor, 50 Hz, 2850 rpm.
- Class F insulation.
- IP68 protection.
- Working voltage: single-phase 230 V, three-phase 400 V.
- Oil filled electric motor.

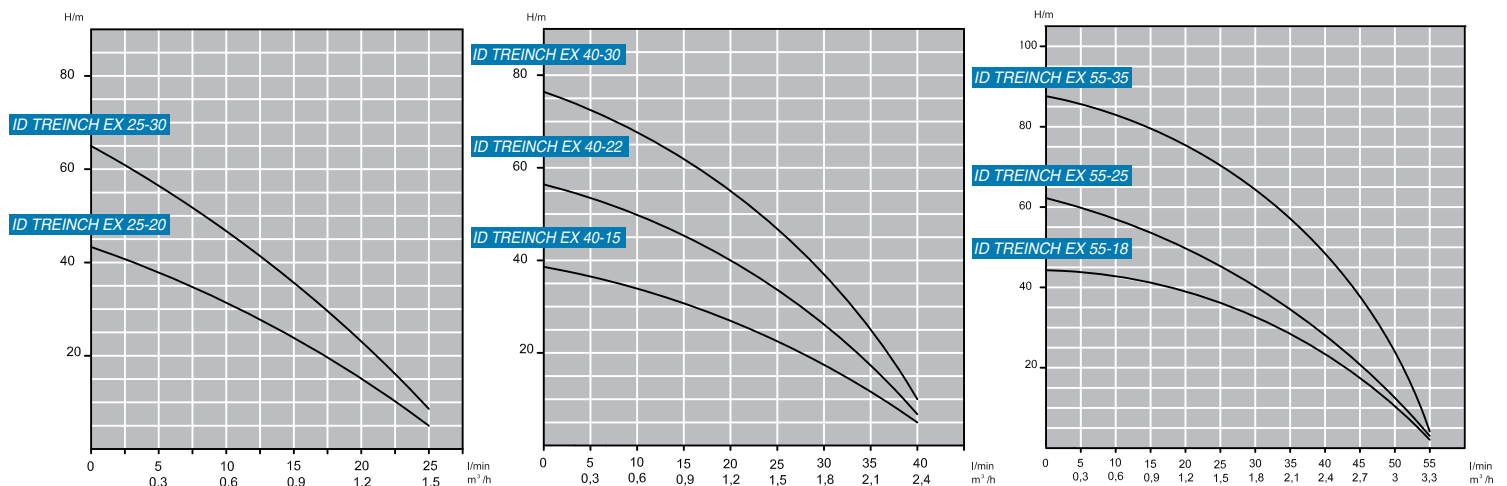

## ACCESSORIES

- Control panel.
- Intrinsically safe module with ATEX supply circuit.
- ID ATEX electronic level transmitter.
- TPE-E 4G1,5 composed cable.

## ATEX marking

<b>II</b>	<i>Group of apparatus - equipment for surface plants.</i>
<b>2G</b>	<i>Category - equipment compatible to be installed in potentially explosive atmospheres with gas, steams and vapors (area 1); this equipment is suitable for area 1 and area 2.</i>

## 3" ATEX electric pumps and 3" ID ATEX electric pumps protection

<b>Ex</b>	<i>Protection against explosions.</i>
<b>eb</b>	<i>Type of protection applied to electrical motor – increased safety “e”, level “b” – type of protection applied to electrical apparatus in which additional measures are applied so as to give increased safety against the possibility to excessive temperature and of the occurrence of ark and sparks in normal service or under specified abnormal conditions.</i>
<b>h</b>	<i>Type of protection applied to hydraulic part – constructional safety “c” – ignition protection where constructional measures are applied so as to protect against the possibility of ignition from hot surfaces, sparks and adiabatic compression generated by moving parts</i>
<b>mb</b>	<i>Type of protection applied to connection facility to external circuits – encapsulation “m”, level “b” – type of protection whereby parts that are capable of igniting an explosive atmosphere by either sparking or heating are fully enclosed in a compound or other non-metallic enclosure with adhesion in such a way as to avoid ignition of a dust layer or explosive atmosphere under operating or installation conditions.</i>
<b>ob</b>	<i>Type of protection applied to electrical motor – liquid immersion “o”, level “b” – type of protection in which the electrical equipment or parts of the electrical equipment are immersed in a protective liquid in such a way that an explosive gas atmosphere which may be above the liquid or outside the enclosure cannot be ignited.</i>
<b>IIC</b>	<i>Subgroup of gas: equipment compatible to be installed with all combustible gas.</i>
<b>T4</b>	<i>Class temperature – maximum temperature of the equipment 135 °C.</i>
<b>Gb</b>	<i>Protection level of equipment compatible to be installed in potentially explosive atmospheres with combustible gas - level b.</i>
