## **NEW FOR 2013** 15mm Copper Pipe Transition Rubber Insert

**Product Spotlight** – 15mm Transition Rubber Insert for 15 mm Copper Pipes.

Transition any 20mm PLAST fitting to adapt it to fit 15mm Copper Pipe. To convert the fitting push the pipe down the centre through the tapered end into the slim end where a ridge stops the pipe going to far. This is then inserted into the compression fitting, slim end first. The nut pushes down on the tapered end forming a compression fit.
