Mike Deed presents his latest paper at the Ground Water Conference and Exhibition 2013 in South Africa

Mike Deed was recently invited to present his latest paper, *Groundwater Asset Management in the Mining Industry*, at the Ground Water Division Conference in Durban South Africa. Written jointly by Mike and Martin Preene of Golder Associates, the paper considers how best to manage the problems of groundwater contamination in mining environments. At the concurrent exhibition a number of enquiries about BoreSaver were received from the Western and Eastern Cape, both of which are prone to iron bacteria problems. To read the paper in full click [here](#).

Come and meet us at Aquatech 2013

Come and meet us at Aquatech, the world's leading trade exhibition for process, drinking and waste water. Held at Amsterdam from 5th to 8th November 2013 you can find us in Hall 6-7 on the UK Pavilion Stand **233-2**. We will be showcasing our well rehabilitation and borehole cleaning treatments, the Laval downhole video inspection camera, Wellmaster flexible rising main and our range of filtration and sand separator equipment.

SAVE €65 on entry fee! We have some **FREE Aquatech entry passes to give away**, [contact us](#) to enquire about more details.

If you would like to find out more click [here](#) or contact Mike Deed on mike@geoquipservices.co.uk or on +44 (0)1473 462046.

NEW PRODUCT – The SCAT Self Closing TAP

Save water, energy and money with the SCAT, a non-corrosive, self-closing tap that was originally designed for use where water is scarce and the effects of taps left running could be disastrous. Lightweight, robust and WRAS approved the SCAT water-saving tap incorporates a unique internal valve that allows the tap to be opened at high pressure and closed firmly under low pressure. There are no hand wheels to turn or levels to move, just lift the SCAT tap, get your water, and as soon as you remove your hand, the tap will close.

- All plastic construction - fitted with a 3/4" galvanised elbow
- Automatic shut off
- Easy to use under high or low pressure conditions
- WRAS approved
- Saves water, energy and money

Read Our Latest Case Study – Aintree Race Course

The Race Director at Aintree Race Course turned to Geoquip and BoreSaver following problems with the water supply, pumps and panels tripping out and a falling yield. A downhole CCTV survey revealed extensive iron bacteria contamination had clogged the pumps and screens as well as the irrigators and sprinklers round the entire racecourse...

Click [here](#) to read the case study and find out how BoreSaver solved Aintree's water problems.

Watch this space... New R-CAM 1000 + Coming Soon.

A new R-CAM 1000 downhole camera with enhanced video inspection facilities is about to be launched. Look out for a press release coming soon with all the details.

We are also introducing a new line of flight cases.

Please contact us direct if you would like immediate details on either product! info@geoquipservices.co.uk or +44 (0)1473 462046.
