Feb 2014

## In this month's issue:

- 40% energy savings with our new inverters!
- Booster Sets developed for the rail industry
- Geodrilling International features BoreSaver
- Global drinks manufacturer Case Study

## New inverters offer huge energy savings

Click [here](#) to find out more about our new range of constant pressure inverters .

- Up to 40% guaranteed energy savings
- Ideal for retro fitting
- From 1.1kw to 30kw in single or 3 phase
- Simple to install and use

We have a huge range of inverters available. Ring now with your requirements on +44 (0)1473 462046 or click [here](#) to see the full range on our website.

## Special Projects - Booster Sets

We recently supplied a range of booster sets to the rail industry incorporating some of our new specialist motor mount constant pressure inverters. The benefits of using these booster sets include:

- Energy efficiency
- Automatic set up with 'plug & play' calibration software
- Remote control monitoring capability
- Compact footprint
- Dry run protection built in

If you are an OEM or end user of this type of application contact us now on [info@geoquipservices.co.uk](mailto:info@geoquipservices.co.uk) or on +44 (0)1473 462046.

## Read about BoreSaver in Geodrilling international

Read our article on how to clean and rehabilitate wells suffering from iron and calcium contamination. In the December 2013 issue of Geodrilling International Mike Deed discusses ground water asset management, rehabilitation techniques and the best way to use BoreSaver.

The case studies featured in this article include improving a geothermal plant in Lodi, Italy and water yields for a large mine in Australia.

**Global Drinks Manufacturer - New Case**

## Study

Read how BoreSaver was used to rehabilitate the borehole of a global drinks manufacturer in Scotland. The borehole is used to provide a constant water supply and production managers at the plant we concerned to see falling yields and therefore increased production costs. Specialists found iron oxide clogging on the pump and screens, and iron bacteria in the water. The pump, screens and water were cleaned using BoreSaver resulting in:

- Increased yield
- Reduced drawdown
- Reduced pumping costs
